

Critical Race Theory School Creation and the Politics of Interruption at SUNY

Critical race theory (CRT) is an academic framework that examines the intersection of race, law, and power. It was developed in the 1970s and 1980s by legal scholars such as Derrick Bell, Kimberlé Crenshaw, and

Richard Delgado. CRT has been used to analyze a wide range of social issues, including racial profiling, mass incarceration, and affirmative action.

In recent years, CRT has become a target of conservative politicians and pundits. These critics argue that CRT is divisive and that it teaches children to hate white people. As a result, several states have passed laws banning or restricting the teaching of CRT in schools.

The State University of New York (SUNY) is one of the largest public university systems in the United States. In 2020, SUNY announced the creation of a new school dedicated to the study of CRT. The school, which is called the Center for Antiracism and Social Justice, is the first of its kind in the United States.

The creation of the school has been met with both praise and criticism. Supporters of the school argue that it is necessary to address the systemic

racism that exists in American society. Critics argue that the school is a waste of taxpayer money and that it will only further divide the country.

The Politics of CRT

The debate over CRT is a political one. CRT is a challenge to the traditional narrative of American history, which has been dominated by white perspectives. CRT scholars argue that this traditional narrative ignores the experiences of people of color and that it perpetuates racism.

The debate over CRT is also a battle over the future of education. Conservatives argue that CRT is a divisive ideology that should not be taught in schools. Liberals argue that CRT is an essential tool for understanding the history of racism in the United States and that it should be taught in all schools.

The Creation of the Center for Antiracism and Social Justice

The creation of the Center for Antiracism and Social Justice was a major victory for CRT scholars and activists. The school is a testament to the growing recognition of the importance of CRT.

The school will offer a variety of courses on CRT and related topics. The school will also host conferences and workshops on CRT.

The creation of the school is a sign of the growing importance of CRT in American society. CRT is a powerful tool for understanding the history of racism in the United States and for fighting for a more just future.

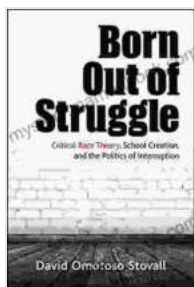

The Future of CRT

The future of CRT is uncertain. The debate over CRT is likely to continue for many years to come. However, the creation of the Center for Antiracism and Social Justice is a sign that CRT is here to stay.

CRT is a powerful tool for understanding the history of racism in the United States and for fighting for a more just future. The creation of the Center for Antiracism and Social Justice is a major victory for CRT scholars and activists.
